

# Evaluation of Photovoltaic Applied in Building Design

By Chao-Yu Chan

VDM Verlag Jun 2009, 2009. Taschenbuch. Book Condition: Neu. 220x150x10 mm. Neuware - Photovoltaic is a clean and renewable energy. Irradiation and performance of PV system are important to PV benefit. Different estimative models of irradiation had been proposed. Some of the models are complicated in calculation with locality, and the strategy of PV application affects the performance of system. The purpose of the work is to build a simplify method, by means of the equations of slope irradiation ratios, for easily evaluating the PV power transformed by modules on building envelope. Developing an evaluation model of strategy for PV application on building can find the applicable space and equipment and suitable use type. Simultaneously, the local irradiation and PV operation were recorded. The results of validation of the estimated equation were presented by correlation analysis. The equations and estimation can be a reference for evaluating PV application in building. A PV interior lighting integrated with grid lighting system were achieved and proposed as suitable use type of BiPV. The evaluative model of PV applicability and the suitable use type can be a strategy of BIPV technology applied in building design. 172 pp. Englisch.

#### Reviews

The most effective book i ever read through. it had been writtern quite flawlessly and valuable. I am just happy to let you know that here is the very best publication i have got read through during my individual daily life and may be he greatest pdf for ever.

#### -- Prof. Adonis Rodriguez

Comprehensive information for publication fans. I have got read and i am confident that i am going to likely to go through once again once again in the foreseeable future. I am just very happy to let you know that this is actually the greatest book i have read in my very own existence and could be he finest book for at any time.

-- Clair Windler
