# SOME SCHWARZ METHODS FOR SYMMETRIC AND NONSYMMETRIC ELLIPTIC PROBLEMS, VOL. 255 (CLASSIC REPRINT)

To download Some Schwarz Methods for Symmetric and Nonsymmetric Elliptic Problems, Vol. 255 (Classic Reprint) eBook, please access the button below and download the document or get access to additional information that are related to SOME SCHWARZ METHODS FOR SYMMETRIC AND NONSYMMETRIC ELLIPTIC PROBLEMS, VOL. 255 (CLASSIC REPRINT) book.

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Some Schwarz Methods for Symmetric and Nonsymmetric Elliptic Problems, Vol. 255 This paper begins with an introduction to additive and multiplicative Schwarz methods. A two-level method is then reviewed and a new result on its rate of convergence is established for the case when the overlap is small. Recent results by Xuejun Zhang, on multi-level Schwarz methods, are formulated and discussed. The paper is concluded with a discussion of recent joint results with Xiao-Chuan Cai on nonsymmetric and indefinite problems. Key Words, domain decomposition, Schwarz methods, finite elements, nonsymmetric and indefinite elliptic problems AMS(MOS) subject classifications. 65F10, 65N30 1. Introduction. Over the last few years, a general theory has been developed for the study of additive and multiplicative Schwarz methods. Many domain decomposition and certain multigrid methods can now be successfully analyzed inside this framework. Early work by P.-L. Lions [23], [24] gave an important impetus to this effort. The additive Schwarz methods were then developed by Dryja and Widlund [15], [16], [17], Matsokin and Nepomnyaschikh [25] and Nepomnyaschikh [26] and others. Recent efforts by Bramble, Pasciak, Wang and Xu [4] and Xu [36] have extended the general framework making a systematic study of multiplicative Schwarz methods possible. The multiplicative algorithms are direct generalizations of the original alternating method discovered more than 120 years ago by H. A. Schwarz [30]. We note that most of the work in recent years has focused on the positive definite, symmetric case. While this theory is quite general, the applications so far have primarily been to the solution of the often large linear systems of algebraic equations, which arise in the finite element discretization of elliptic and parabolic boundary...
